

8 JANUARY 2026

Antimony Drilling Program Commenced

HIGHLIGHTS

- Drilling has commenced at the Bond Road Antimony Prospect
- Exploration program targeting high-grade antimony veins within interpreted fault structures.
- Up to 1,200m of exploration drilling planned across several hole locations

Albright Metals Limited ("Albright Metals" or "the Company") is pleased to advise that drilling has commenced at its Bond Road Antimony Prospect, which is part of the Golden Pike Gold and Antimony Project in New Brunswick, Canada.

CEO, Greg Hill comments, *"After the successful completion of gold drilling at our Vail Road Gold Deposit, we are pleased to see the progress that the team in Canada is making on the antimony drilling program."*

The drilling program aims to target high-grade antimony veins within interpreted fault structures, believed to be the source of the high-grade antimony boulder samples and strong antimony soil anomaly identified at the prospect.¹

ABOUT ALBRIGHT METALS

Albright Metals' current projects are located in Canada and Western Australia, both Tier One mining and exploration jurisdictions.

Albright Metals has executed an agreement with Globex Mining Enterprises Inc. (GMX-TSX, GLBXF-OTCQX, GIMN-FSE) to acquire the Golden Pike Gold and Antimony Project in New Brunswick, Canada.³ The project covers approximately 3,292ha of contiguous mining claims which includes the Vail Road high-grade gold deposit classified under NI 43-101,⁴ and the exploration-stage Bond Road antimony prospect. The Golden Pike Project is in an area that is close to road, rail, port and grid power infrastructure. Southern New Brunswick is on the Canadian east coast, adjacent to Maine, USA. It enjoys a mild maritime climate, allowing year round exploration activities. The province has a mature mining services industry and has historically produced antimony and gold from multiple mines.

The Company's Bryah Basin licences hold potential for copper and gold. Albright Metals also has a substantial \$7M manganese joint venture on the licences with ASX listed OM Holdings Limited (ASX: OMH), with OMH having already spent over \$4.5 million to earn-in to the Manganese Rights of the project.

Albright Metals holds a suite of mineral rights, including copper, nickel and gold, over the Gabanintha project, near Meekatharra,⁵ which has a JORC 2012 Mineral Resource for Cu, Ni, Co and additional structural gold potential.

Albright Metals was formerly known as Bryah Resources, trading under the ASX code BYH.

EXPLORATION RESULTS

Where the Company refers to Exploration Results in this announcement (referencing previous releases made to the ASX), the Company is not aware of any new information or data that materially affects the information included in the relevant market announcements.

FORWARD LOOKING STATEMENTS

This announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Readers should not place undue reliance on forward looking information. The Company does not undertake any obligation to release publicly any revisions to any "forward looking statement" to reflect events or circumstances after the date of this report, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.
