About EMC Gold Corporation

EMC Gold Corporation (ASX:EM3) is an exploration company with a global portfolio of exploration assets. The Company's flagship project is Salave, one of the largest undeveloped gold projects in Europe. Salave is 100 per cent owned by the Company and located in the north of Spain in the Principality of Asturias.

The Company acquired Australian mineral explorer Marlee Gold Pty Ltd. The Company retains one exploration permit in Western Australia, Ivan Well, presenting an opportunity to explore for surface and sub-surface gold in the future. For more information visit www.emcgold.com.au.

About Salave Gold Project

The project has a Measured Mineral Resource of 1.03 million tonnes grading 5.59 g/t Au, containing 0.19 million ounces of gold; an Indicated Mineral Resource of 7.18 million tonnes grading 4.43 g/t Au, containing 1.02 million ounces of gold, plus Inferred Resources totalling 3.12 million tonnes grading 3.47 g/t Au, containing 0.35 million ounces of gold.

The information in this announcement that relates to the Mineral Resource estimate for the Salave project was first released by the Company in its news release titled 'New NI 43-101 Mineral Resource Estimate Increases Resources at Salave' dated 25 October 2018.

EMC Gold confirms that it is not aware of any new information or data that materially affects the information included in the original announcement and that all material assumptions and technical parameters underpinning the estimate in the previous announcement continue to apply and have not materially changed.

A full technical report summarising the Mineral Resource estimate completed by Bara Consulting is available on the Company's web site (www.emcgold.com.au) and posted on SEDAR. In addition to the current Mineral Resource, historical exploration work suggests there is the potential for additional mineralisation within EMC Gold's landholdings.
