

ANNOUNCEMENT

31 October 2025

**ACTIVITIES REPORT FOR THE QUARTER ENDED 30 SEPTEMBER 2025 (FY2026 Q1)
FOR MC MINING LIMITED (MC Mining or the Company)
AND ITS SUBSIDIARY COMPANIES**

HIGHLIGHTS

Operations

- Health and safety performance across the group improved, with the Company having operated with no lost time injuries (LTI) for the quarter. The Makhado steelmaking hard coking coal Project (**Makhado Project** or **Makhado**) has now reached 911 days LTI-free, for 949,000 manhours worked, whilst Uitkomst steelmaking coal Colliery (**Uitkomst Colliery** or **Uitkomst**) reached 228 days LTI-free;
- Development of the Makhado Project progressed well, with key milestones achieved despite experiencing some construction delays: commissioning activities for the coal handling and preparation plant (**CHPP** or **Coal Plant**) are expected to begin by December 2025; the principal mining contractor has commenced with the open pit mining of the box cut; civil foundational works for the Coal Plant are largely complete; and significant progress is being made towards the commissioning of the 14km overhead power transmission line;
- The operational improvement plan for Uitkomst Colliery (**Turnaround Plan**) was approved and key improvement initiatives are being executed accordingly. Overhead cost reductions are being realised and focus has moved to increasing production via improved equipment availabilities and utilisation. Improved production is expected in the last quarter of this calendar year.
- Run-of-mine (**ROM**) coal production from Uitkomst Colliery decreased by 21% on the previous quarter's production, and was 8% lower than the comparative period in FY2025 at 82,588 tonnes (t) (FY2025 Q1: 90,069t). The reduction in production, compared to FY2025 Q1, was due to delays in the start of the turnaround plan, temporary operational challenges (geological intrusions) and

Interim Chairman Mathews Senosi **Managing Director and Chief Executive Officer** Yi (Christine) He

Non-executive Directors Jianheng (Albert) Deng, Dr S West, B Pavlovski, M Huang, L Wang, Dr H Wang

reduced machine availability due to intensive repair and refurbishment being carried as part of turnaround plan.

- Uitkomst Colliery sold 47,116t of high-grade coal during the quarter (FY2025 Q1: 47,586t), a 1% decrease on the prior year sales, and there was no sales of the lower grade middlings coal (FY2025 Q1: 8,719). Coal plant yields remained high at 73% due to operational improvement initiatives over the period, which offset the lower ROM coal production;
- Limited activities were undertaken at the Company's Vele Aluwani semi-soft coking coal (**SSCC**) and thermal coal (**TC**) Colliery (**Vele Colliery** or **Vele**), whilst the numerous coal deposits within the Greater Soutpansberg Projects (**GSP**) were evaluated and prioritised for development; and
- Depressed TC prices continued with average prices of US\$91/t for the three months, compared to US\$90/t in Q4 FY2025 and US\$110/t in Q1 of FY2025. Premium steelmaking HCC prices have decreased, averaging US\$185/t in the quarter compared to US\$212/t in FY2025 Q1.

Corporate

- Available cash and facilities was US\$13.1 million at the period end (FY2025 Q4: US\$7.4 million);
- Kinetic Development Group Limited (**KDG**) made payments amounting to US\$15 million for the purchase of MC Mining shares, as part of the share subscription agreement, during the quarter. US\$5 million of the payment relates to the fourth Second Closing and US\$10 million of the payment relates to the fifth Second Closing as per the Share Subscription Agreement;
- The Company made a further repayment of ZAR10 million towards the Industrial Development Corporation (**IDC**) loan during the quarter;
- Permanent appointment of Ms Yi (Christine) He as Managing Director and Chief Executive Officer of MC Mining Limited.

Events subsequent to the end of the quarter

- Jianheng (Albert) Deng was appointed as a Non-Executive Director of MC Mining; and

- Zhen (Brian) He resigned from being a Non-Executive Director of MC Mining.

DETAILED QUARTERLY OPERATIONS REPORTS

Makhado HCC Project – Soutpansberg Coalfield, Limpopo Province, South Africa (67% owned)

Project Overview. Construction of the Makhado steelmaking hard coking coal Project (**Makhado Project or Makhado**) progressed well, with commissioning activities of the Coal Plant scheduled to begin in December 2025, despite experiencing some construction delays. During the quarter, more project development milestones were successfully achieved, whilst maintaining the excellent safety, health, environmental and regulatory compliance performances that have become a recognizable feature of the venture to date. The colliery will be South Africa's largest hard coking coal (**HCC**) producer, designed to produce 800,000 tonnes a year of HCC 64 Mid Vol, once steady-state operation for the foundation phase is reached. The life-of-mine (**LOM**) for the Makhado Colliery is planned to be 28 years. Contiguous to the Makhado Project are the satellite Greater Soutpansberg Projects (**GSP**), that are all at granted Mining Right status, also endowed with steelmaking HCC potential, and scheduled to be the focus of mine planning, once the Makhado Project is commissioned.

Health, Safety, Regulatory Compliance and Environmental Performance. The Makhado Project achieved another quarter free from any LTIs (FY2025 Q4: nil), with 911 days LTI-free and 949,000 manhours now accumulated for the project to date. Employee health initiatives focused on raising awareness on mental health, men's health and chronic conditions management. The workforce onsite now numbers 790 people of whom 312 are employed from the host communities. In line with the project's social and labour plan commitments and environmental management obligations, designs to improve the regional roads (D745 and D3672) are largely completed, and a host community business has been contracted to undertake the road maintenance.

The mine continued to be built with zero reportable environmental incidents and keen emphasis being placed on environmental protection and management. As of the reporting date, the Department of

Mineral and Petroleum Resources (**DMPR**) undertook a comprehensive and multi-discipline onsite health and safety, environmental, social and labour planning and regulatory compliance audit of the Makhado Project. The Pollution Prevention Plan and the Greenhouse Gases Emission report were approved by the Department of Forestry, Fisheries and the Environment, further improving the environmental credentials of the Makhado Project. The Company continues to promote collaborative and constructive relationships with regulatory authorities and host community stakeholders.

Project Development Milestones Achieved. The Makhado Project is progressing strongly with more key development milestones achieved this quarter. Coal Plant commissioning activities are expected to start during December 2025, despite delays encountered due to inclement weather, sourcing of suitable construction materials and obtaining of all requisite clearances to continue with construction of the 14km long power transmission line. The project expenditure remains within the budgeted estimates. Noteworthy features of the project include:

- *Open pit Mining:* – Open pit mining of the boxcut commenced during the quarter, with the first in-pit blast being performed in early October 2025. JCI Mining (Pty) Ltd ('JCI'), the principal mining contractor, now has 167 people onsite, with a mining fleet consisting of 8 backhoe configured excavators, supported by a team of 33 articulated dump trucks. A further 4 trucks are schedule to be mobilised during the coming quarter. Mining of overburden material is progressing steadily, with 1.3 million bench cubic metres (BCM) already mined. Coal exposure is anticipated by November 2025.
- *Construction of the Coal Plant:* – Civil foundational works are largely complete, and the focus has now shifted to steelwork, mechanical, and equipment installations. Despite the delays experienced due to weather, sourcing of construction materials, obtaining clearances to continue with powerline construction and slow deliveries of equipment procured offshore, commissioning activities are scheduled to commence in December 2025. Site infrastructure development is advancing steadily. Access and bulk services remain on schedule for completion in time for production start-up. Mine access roads are complete and currently undergoing wear course and stormwater drainage works. The CHPP will process ROM coal to

produce a primary product of HCC 64 Mid Vol and a secondary product of 5,500kcal API4 thermal coal (**TC**). Work is continuing on the planning of the expansion strategy once the foundation phase is commissioned. Environmental and Process Technologies (**Enprotec**), the lead contractors for building the Coal Plant, now manage 450 persons on site, across 16 different sub-contractors, with 140 of these employees having been recruited from the host communities.

- *Construction of permanent access bridge:* - The construction of a permanent bridge crossing the Mutamba River, to provide access to the mine site is continuing. The Matamba River bridge is advancing, with foundation works to be completed in October 2025 and overall completion expected in December 2025. A temporary access bridge, completed in FY2025 Q3 is currently being used to provide site access.
- *Construction power reticulation:* –The main power supply line construction is progressing well and remains on track for completion in December 2025. This power line, the Paradise Overhead Line (**OHL**), will be a 14km long, 22kV bulk power transmission line, to deliver 7.5MVA of power to the site from the national grid, via the nearby Paradise Power Station. This workstream is being managed by the EHL Engineering Group (**EHL**) on an EPC-turnkey basis.

Outlook. Construction work and operational readiness activities are ongoing, with commissioning activities for the Coal Plant expected to commence by December 2025.

Uitkomst steelmaking coal Colliery – Utrecht Coalfields, KwaZulu Natal Province, South Africa (84% owned)

Colliery Overview. Intensive re-engineering and operational reviews were completed, resulting in the development of a performance improvement plan for the colliery (**the Turnaround Plan**). The plan will be fully implemented during the last quarter of this calendar year. With the coal preparation plant modifications improving yields to 73%, cost base being permanently reduced, the low-seam

zones largely mined through, and fleet remediation underway, production is expected to improve in the coming quarter.

Health, Safety and Environmental Performance. Uitkomst Colliery had a quarter free of reportable environmental incidents and LTIs (FY2025 Q4: nil LTI). The concerted efforts by site personnel, focusing on behaviour-based safety principles, realignment sessions and operational improvement reviews, have contributed to an improvement in health and safety performance over the period.

Production Performance. The colliery mined 82,588t of ROM coal during the quarter, which was a 21% decrease on the previous quarter, and 8% lower than the comparative period in FY2025 (FY2025 Q1: 90,069t). The 8% decrease in ROM coal production compared to the same period the previous year was due, in part, to disruptions in production whilst reconfiguring the underground mining layout as part of the Turnaround Plan and due to lower coal seam mining heights than what was expected in some sections. Outlook is for an improvement in coal seam mining heights over the next quarter as the operating sections continue to move through the low seam zones. Underground mining fleet condition assessments and remediation plans have commenced to be implemented on-going.

Uitkomst sold 47,116t (FY2025 Q1: 47,586t) of high-grade duff and peas coal, which is in-line with the sales for same period last year. The colliery sold no middlings coal during the three months (FY2025 Q1: 8,719t). The colliery had 3,088t (FY2025 Q1: 2,343) of high-grade coal inventory at the end of September 2025.

The production costs per saleable tonne were 9% higher than the comparative period in FY2025 (FY2026 Q1: US\$107/t vs. FY2025 Q1: US\$97/t). The decrease in volumes resulted in the increase in unit production costs. This was partially offset by the improved yields.

Outlook. Uitkomst Colliery, as of the end of the quarter, has commenced with the implementation of the Turnaround Plan. The focus remains on implementing initiatives to improve equipment availability whilst maintaining excellent safety performance. The Turnaround Plan is being implemented with the assistance of Metalla Tutum Engineering Proprietary Limited (**MTE**). MTE is a

MCMining
LIMITED

South African specialist mining engineering and consulting firm, established in 2017, with expertise in mine management and operational improvements.

Vele Aluwani SSCC and TC Colliery – Limpopo (Tuli) Coalfield (100% owned)

Operations at Vele remain suspended, pending the conclusion of a re-engineered business plan. Work continues on investigating a commercially viable logistics solution for the coal products to come from the colliery. Vele recorded no LTIs (FY2025 Q4: nil) during the quarter.

Greater Soutpansberg Projects (GSP) – Soutpansberg Coalfield (74% owned)

The GSP recorded no LTIs (FY2025 Q4: nil) during the quarter. The GSP are a group of mineral tenements, held as Mining Rights and satellite to the Makhado Project. Work has commenced on assessing and prioritising the various tenements, as part of developing the future pipeline of steelmaking HCC prospects to supplement the Makhado Colliery production. The work required to obtain environmental and water use licences for the Mining Rights are expected to commence during H1 CY2026.

Appendix 5B – Quarterly Cash Flow Report

The Company's available cash balance and facilities as at 30 September 2025 was US\$13.1 million. The aggregate amount of payments to related parties and their associates, as disclosed as item 6.1 of the September 2025 quarter Appendix 5B, was US\$72k, comprising executive and non-executive director remuneration.

About MC Mining Limited:

MC Mining is an ASX/JSE-listed coal exploration, development and mining company operating in South Africa. MC Mining's key projects include the Uitkomst Colliery (metallurgical and thermal coal), Makhado Project (hard coking coal), Vele Colliery (semi-soft coking and thermal coal), and the Greater Soutpansberg Projects (coking and thermal coal).

All figures are denominated in United States dollars unless otherwise stated. Safety metrics are compared to the preceding quarter while financial and operational metrics are measured against the comparable period in the previous financial year. A copy of this report is available on the Company's website, www.mcmining.co.za.

Forward-looking statements

This Announcement, including information included or incorporated by reference in this Announcement, may contain "forward-looking statements" concerning MC Mining that are subject to risks and uncertainties. Generally, the words "will", "may", "should", "continue", "believes", "expects", "intends", "anticipates" or similar expressions identify forward-looking statements. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. Many of these risks and uncertainties relate to factors that are beyond MC Mining's ability to control or estimate precisely, such as future market conditions, changes in regulatory environment and the behaviour of other market participants. MC Mining cannot give any assurance that such forward-looking statements will prove to have been correct. The reader is cautioned not to place undue reliance on these forward-looking statements. MC Mining assumes no obligation and does not undertake any obligation to update or revise publicly any of the forward-looking statements set out herein, whether as a result of new information, future events or otherwise, except to the extent legally required.

Statements of intention

Statements of intention are statements of current intentions only, which may change as new information becomes available or circumstances change.

8.5	Unused finance facilities available at quarter end (item 7.5)	259
8.6	Total available funding (item 8.4 + item 8.5)	13,420
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	3.3
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	<div style="border: 1px solid black; height: 30px; margin-top: 5px;"></div>	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	<div style="border: 1px solid black; height: 30px; margin-top: 5px;"></div>	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	<div style="border: 1px solid black; height: 30px; margin-top: 5px;"></div>	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>		

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 October 2025

Authorised by: The Disclosure Committee
(Name of body or officer authorising release – see note 4)

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
