

Hamersley Iron Ore Project Update

Eminence Minerals Limited (ASX: EMA) ('Eminence' or the 'Company') provides an update on the judicial review proceedings in the Supreme Court of Western Australia concerning the Aboriginal Cultural Heritage Committee's decision in relation to two registered Aboriginal sites within the Company's Hamersley Iron Ore Project (M47/1662).

The Company and the Department of Planning, Lands and Heritage have each filed supplementary evidence. The evidence addresses, among other matters, whether the mapping information and boundary data that were before the Committee at the time of its decision provided sufficient certainty as to the location of the two registered Aboriginal sites, and whether the Committee's decision is sufficiently certain as to the location of those sites.

The Court has relisted the matter for hearing on Friday, 12 December 2025.

This announcement has been authorised for release by the Board of Eminence Minerals Limited.
