Astral Resources NL (ASX: AAR) (**Astral** or the **Company**) is pleased to report on its activities during the quarter ended 31 December 2025 (the **Quarter**).

Astral continued to progress the Mandilla Project, which comprises the following three projects:

1. Mandilla Gold Project (**Mandilla**);
2. Feysville Gold Project (**Feysville**); and
3. Spargoville Gold Project (**Spargoville**).

In June 2025, Astral announced the results of a Preliminary Feasibility Study for the Mandilla Gold Project (**Mandilla PFS**), which also included the mining of gold deposits at Feysville. It was based on a standalone project comprising seven open pit mines feeding a 2.75Mtpa processing facility, producing 95koz per year for the first 12 years. The base case gold price assumption for the Mandilla PFS was A\$4,250/oz and demonstrated a Net Present Value (8% discount rate) (**NPV₈**) of \$1.4 billion¹. **At a A\$6,500 gold price which, at the time of writing is more than A\$200 less than the spot gold price, the NPV₈ increases to \$3.1 billion².**

Four open-pit mines at Mandilla were included in the Mandilla PFS (Theia, Hestia, Eos and Iris), and three open-pits mines at Feysville (Kamperman, Think Big and Rogan Josh).

A map illustrating the location of Astral's project interests is set out in Figure 1.

MANDILLA GOLD PROJECT

The Mandilla Gold Project (**Mandilla**) is situated in the northern Widgiemooltha greenstone belt, approximately 70 kilometres south of the significant mining centre of Kalgoorlie, Western Australia.

The area hosts world-class deposits such as the Golden Mile Super Pit in Kalgoorlie owned by Northern Star Resources Limited (ASX: NST) and the St Ives Gold Mine approximately 20 kilometres to the south-east of Kambalda, owned by Gold Fields Limited, as well as the Beta Hunt Gold Mine immediately to the south of Kambalda owned by Westgold Resources Limited (ASX: WGX).

Mandilla is covered by existing Mining Leases which are not subject to any third-party royalties other than the standard WA Government gold royalty.

The Mandilla Gold Project includes the Theia, Iris, Eos and Hestia deposits.

Gold mineralisation at Theia and Iris is comprised of structurally controlled quartz vein arrays and hydrothermal alteration close to the western margin of the Emu Rocks Granite and locally in contact with sediments of the Spargoville Group.

Significant NW to WNW-trending structures along the western flank of the project are interpreted from aeromagnetic data to cut through the granitic intrusion. These structures are considered important in localising gold mineralisation at Theia, which has a mineralised footprint extending over a strike length of more than 1.6km.

A second sub-parallel structure hosts gold mineralisation at the Iris deposit. The mineralised footprint at Iris extends over a strike length of approximately 600 metres, combining with Theia to form a mineralised zone extending over a strike length of more than 2.2 kilometres.

At Eos, located further to the south-east, a relatively shallow high-grade mineralised palaeochannel deposit has been identified which extends over a length of approximately 600 metres. A primary gold source is also present, with further drilling required to determine both the nature and structural controls on the mineralisation and its extent.

Mineralisation delineated over approximately 800 metres of strike at the Hestia deposit, located approximately 500 metres west of Theia, is associated with a shear zone adjacent to a mafic/sediment contact, interpreted to be part of the major north-south trending group of thrust faults known as the Spargoville Shear Corridor.

Locally, the Spargoville Shear Corridor hosts the historically mined Wattle Dam gold mine (266koz at 10.6g/t Au) and, further to the north, the Ghost Crab/Mt Marion mine (>1Moz).

The mineralisation at Hestia, which is present in a different geological setting to bedrock mineralisation at Theia and Iris, remains open both down-dip and along strike.

In April 2025, Astral announced a Mineral Resource Estimate (**MRE**) of **42Mt at 1.1 g/t Au for 1.43Moz** of contained gold³ for the Mandilla Gold Project.

³ - Theia JORC 2012 Mineral Resource Estimate: 24.5Mt at 1.1g/t Au for 832koz Indicated Mineral Resources and 8.8Mt at 1.2g/t Au for 323koz Inferred Mineral Resources (refer to Astral ASX announcement dated 3 April 2025)

Metallurgical testing undertaken on each of the main deposits at Mandilla – Theia, Iris, Eos and Hestia – has demonstrated high gravity recoverable gold, fast leach kinetics and exceptional overall gold recoveries with low reagent consumptions and coarse grinding^{4,5,6}.

A map of Mandilla illustrating both the local area geology and mineral deposits is set out in Figure 2.

MANDILLA EXPLORATION

Drilling

During the Quarter, Astral completed a total of 13,459 metres of drilling at Mandilla, including 73 holes (10,676 metres) of RC drilling and 14 holes (2,783 metres) of DD.

The RC drilling encompassed the following:

- 31 holes (3,472 metres) of in-fill drilling at the Theia deposit, completing the 99-hole (10,000-metre) program (**Theia RC In-fill Program**).
- 9 holes (840 metres) testing for mineralisation on the bridge between the Theia and Iris deposits.
- 5 holes (1,086 metres) of infill, extensional and sterilisation drilling at the Hestia deposit;
- 1 hole (220 metres) drilled immediately west of the Theia deposit, designed to test a potential structure oriented sub-parallel in the sediment package (refer below to additional drilling located on the Spargoville Gold Project tenure); and
- 6 holes (840 metres) of diamond pre-collars at the Hestia and Theia deposits.
- 14 holes (3,049 metres) drilled immediately west of the Theia deposit, designed to test a potential structure oriented sub-parallel in the sediment package; and
- 7 holes (1,233 metres) of drilling south of the Hestia deposit, for sterilisation purposes.

The DD encompassed the following:

- 3 holes for 776 metres drilled to test an interpreted high-grade structure (the 230 shear) within the Theia deposit;
- 4 holes for 1,647 metres drilled to test for the presence of a potential sub-parallel mineralised structure to the east and below the proposed Stage 5 open pit shell at the Theia deposit; and
- 7 holes for 360 metres of geotechnical drilling at the Hestia and Eos deposits.

Assay Results Reported

During the Quarter, Astral reported assay results for a total 82 RC drill holes for 9,096 metres from the Theia RC In-fill Program.

Theia RC In-fill Program

The Theia Deposit hosts an MRE of **33.3Mt at 1.1g/t Au for 1.2Moz of contained gold⁷**.

In the production case outlined in the Mandilla PFS, the Theia deposit contributes 1.1Moz or 75% of the 1.48Moz total. As a result, the Theia deposit is crucial to the overall success of the Mandilla Gold Project.

The Mandilla PFS contemplated five stages of Theia open pit development.

Stage 1 encompasses 4.2Mt at 1.1g/t Au for 146,000 ounces of contained gold over the first 21 months of the project. The strip ratio for this stage is 4:1.

⁷ - Theia JORC 2012 Mineral Resource Estimate: 24.5Mt at 1.1g/t Au for 832koz Indicated Mineral Resources and 8.8Mt at 1.2g/t Au for 323koz Inferred mineral Resources (refer to Astral ASX announcement dated 3 April 2025)

To increase the confidence in the MRE for this first stage of mining, Astral designed a 99-hole (11,121-metre) program of RC in-fill drilling to increase the drill density over an 80-metre by 120-metre panel of the Theia Stage 1 Open Pit to 12-metres by 12-metres down to the 200m RL.

Assay results for the first 17 holes (2,030m) were reported on 10 September 2025, with the remaining assay results reported during the Quarter, as follows:

- 29 holes (3,233 metres) reported on 15 October 2025⁸;
- 16 holes (1,765 metres) reported on 23 October 2025⁹;
- 20 holes (2,080 metres) reported on 18 November 2025¹⁰; and

FEYSVILLE GOLD PROJECT

The Feysville Gold Project (**Feysville**) is located within the north-north-west trending Norseman – Wiluna Greenstone Belt within the Kambalda Domain of the Archean Yilgarn Craton, approximately 14km south of the KCGM Super Pit in Kalgoorlie.

Significant gold and nickel mineralisation occurs throughout the belt, including world-class deposits such as the Golden Mile Super Pit in Kalgoorlie owned by Northern Star Resources Limited (ASX: NST) and the St Ives Gold Mine south of Kambalda owned by Gold Fields Limited, as well as the substantial Beta Hunt Gold Mine owned by Westgold Resources Limited (ASX: WGX).

Feysville hosts an MRE of **5Mt at 1.2g/t Au for 196koz**¹³ of contained gold at the Kamperman, Think Big and Rogan Josh deposits. The recently completed Mandilla PFS demonstrated that Feysville is a valuable source of satellite ore feed for a future operation based at Astral's flagship Mandilla Gold Project, contributing **3.7Mt at 1.1g/t Au for 132koz** towards the production target of **1.41Moz**¹⁴.

Locally, Feysville has been interpreted to contain upthrust ultramafics, emplaced within a sequence of volcanic sediments (the Black Flag sediment group), granitic intrusions, mafic basalts, gabbro and andesite.

A map of the Feysville Gold Project identifying tenements and deposits/prospects on local area geology, as well as the newly granted Mining Lease, is set out in Figure 5.

FEYSVILLE EXPLORATION

Drilling Completed

During the Quarter, Astral completed a total of 17 holes (2,954 metres) of RC drilling at the Kamperman Deposit. The program comprised several different in-fill and extensional tests, including delineation of the high-grade mineralisation in the footwall of the southern Kamperman lode and potential high-grade parallel vein lodes to the west.

Assay Results Reported

Assay results for the 17-hole (2,954-metre) RC Program at the Kamperman deposit are pending.

EARLY PRODUCTION OPPORTUNITY – THINK BIG DEPOSIT

On 20 October 2025¹⁵, Astral announced the execution of a Letter of Intent (**LOI**) with specialist mining services provider, Mineral Mining Services Pty Ltd (**MMS**), for a Development Partnership/Joint Venture (**JV**) with respect to the Think Big Gold Deposit, within its 100%-owned Feysville Gold Project near Kalgoorlie in WA.

Under the proposed JV, MMS will fund 100% of the development costs for Think Big, which will be recovered from initial project cash flows.

Following cost recovery, profits will be shared, with MMS to receive between 30% and 50%. This structure strongly aligns the interests of both parties to maximise project profitability and ensure efficient development.

The LOI includes a binding 90-day exclusivity period to allow for the negotiation and execution of definitive, binding agreements.

The partnership leverages MMS's extensive experience and capability to accelerate the development of Think Big, creating a clear pathway to commercialisation.

Subject to finalisation of a binding JV and the receipt of approvals, the JV is aiming to commence mining in Q3 2026, aligning with a targeted FID for the Mandilla Gold Project.

FEYSVILLE NATIVE TITLE AGREEMENT

On 24 October 2025¹⁶, Astral announced that its wholly owned subsidiary, Feysville Gold Pty Ltd, had executed a Land Use Agreement with the Marlinyu Ghoorlie Native Title Claimant Group (**Marlinyu Ghoorlie**).

The Agreement covers protocols for heritage surveys, activities to protect identified sites and clearance procedures to facilitate mining activities at the Think Big and Rogan Josh deposits, which are located within Astral's broader 100%-owned Feysville Gold Project near Kalgoorlie in WA.

The Agreement highlights Astral's commitment to working cooperatively with the Marlinyu Ghoorlie towards the responsible development of its broader Feysville and Mandilla Projects.

GRANT OF FEYSVILLE MINING LEASE 26/846

During the Quarter, Feysville Mining Lease 26/846 (**M26/846**) was granted. As outlined in blue in Figure 6, M26/846 includes the Think Big and Rogan Josh Deposits.

Astral intends to immediately commence work on applying for a mining lease to incorporate the Kamperman Deposit. This process is relatively straightforward and is expected to be completed by the June 2026 Quarter at the latest.

Importantly, the grant of M26/846 paves the way for Astral to progress the early production opportunity at the Think Big Deposit (refer above).

SPARGOVILLE GOLD PROJECT

The Spargoville Gold Project (**Spargoville**) is located in the Coolgardie Domain within the Kalgoorlie Terrane, adjacent to Mandilla and approximately 25 km south-west of Kambalda and approximately 20km west of Gold Fields Limited +20-million-ounce St Ives gold camp.

The greenstone stratigraphy of the Kalgoorlie Terrane can be divided into three main units:

1. Predominantly mafic to ultramafic units of the Kambalda Sequence, with these units including the Lunnon Basalt, Kambalda Komatiite, Devon Consols Basalt, and Paringa Basalt;
2. Intermediate to felsic volcanoclastic sequences of the Kalgoorlie Sequence, represented by the Black Flag Group; and
3. Siliciclastic packages of the late basin sequence known as the Merougil Beds.

The Paringa Basalt, or Upper Basalt, is less developed within the Coolgardie Domain, but similar mafic volcanic rocks with comparable chemistry are found in the Wattle Dam area. Slices of the Kambalda Sequence referred to as the Burbanks and Hampton Formations, are believed to represent thrust slices within the Kalgoorlie Sequence.

The Kalgoorlie Terrane has been the subject of at least five major regional deformational events. Granitoid intrusions associated with syntectonic domains are present in the Wattle Dam area, including the Depot Granite and the Widgiemooltha Dome.

Domed structures associated with granitoid emplacement are observed in the St Ives camp, with deposition of the Merougil Beds and emplacement of porphyry intrusions occurring during extensional deformation. Gold occurrences associated with the Zuleika and Spargoville shears are representative of deposits that formed during sinistral transpression on north-west to north-north-west trending structures.

The Spargoville Project comprises several advanced gold prospects and deposits, including Wattle Dam, Eagles Nest, Larkinsville, Hilditch and 5B.

As of May 2025, the combined MRE for Spargoville is **3Mt at 1.4g/t Au for 139koz of contained gold**¹⁷.

The Wattle Dam Gold Project, which accounts for **2.1Mt at 1.3g/t Au for 91koz** of the total MRE, includes the Redback, Golden Orb, Trapdoor, Huntsman, Wattle Dam Stockwork, S5, and 8500N deposits.

Having only been acquired just prior to completion of the Mandilla PFS, Mineral Resources of the Spargoville Gold Project were not included as part of the PFS.

A map of Spargoville illustrating both the local area geology and gold deposits is set out in Figure 7.

LITHIUM JOINT VENTURE

In October 2023, Astral's wholly owned subsidiary, Maximus Resources Limited (**Maximus**) executed a binding agreement with the Korean Mine Rehabilitation and Mineral Resources Corporation (**KOMIR**) in relation to the Lefroy Lithium Project (**Lefroy**).

Under the agreement, KOMIR will fund USD\$3m on lithium exploration activities to earn a 30% interest in the Lithium minerals rights across the Lefroy (Spargoville North) tenements. Maximus is the operator and manager of the exploration program. The Lefroy Lithium Project is located in Western Australia's Eastern Goldfields "lithium corridor", ~20km south of Mineral Resources Ltd (ASX:MIN) Mt Marion Lithium mine.

During December 2025, KOMIR elected to continue to invest in Maximus' Lefroy Lithium project and transferred the third payment of US\$1M for funding exploration activities. To date, KOMIR has funded a total of A\$2.1m (~USD\$1.2m) in exploration expenditure. At 31 December 2025, the balance of the farm-in funding trust account was ~AUD\$2.68M (USD\$1.79M).

DEFINITIVE FEASIBILITY STUDY

On 28 October 2025¹⁸, Astral provided an update with respect to key appointments made in relation to progressing the Mandilla DFS and for operational readiness, including the following:

- Appointment of experienced mining executives Jed Whitford as Chief Operating Officer and Mathew Wilson as General Manager – Mandilla.
- GR Engineering Services appointed to undertake the Mandilla DFS for all process and non-process infrastructure at Mandilla.
- Taylor Collison appointed as debt advisor to assist with debt financing for the Mandilla Project development.
- Level Solutions appointed as Project Management Consultant for the Mandilla Gold Project, providing client-side project governance, risk management, and project controls to support Astral through the Mandilla DFS and delivery phases.

Astral continues to make steady progress with technical work streams and progressing the permitting and approval pathways.

During the Quarter, tenure was granted for the purposes of water exploration. This is a key focus area and work will continue during the March Quarter as a high-priority.

The Mandilla DFS is currently targeted for completion by mid-2026, with a Final Investment Decision (**FID**) expected in the September 2026 Quarter. This would put Astral on-track to deliver first gold production from the Mandilla Gold Project by the end of 2027. Astral will update the market as and when greater certainty is known with respect to key project milestones.

ABOUT ASTRAL RESOURCES

Astral is a gold-focused exploration company targeting the growth and development of its flagship Mandilla Project, encompassing the Mandilla Gold Project, Feysville Gold Project and Spargoville Gold Project.

The Mandilla Gold Project is located approximately 70km south of Kalgoorlie in Western Australia. Mandilla hosts a MRE of **42Mt at 1.1 g/t Au for 1.43Moz** of contained gold²⁰.

Astral is contemporaneously focused on exploration and development activities at its Feysville Gold Project which is located approximately 14km south of the KCGM Super Pit in Kalgoorlie. Feysville hosts a MRE of **5Mt at 1.2 g/t Au for 196koz** of contained gold²¹.

Astral is contemporaneously focused on exploration at the Spargoville Gold Project, which includes approximately 144km² of primarily contiguous tenure to Mandilla. Spargoville hosts a Mineral Resource of **3Mt at 1.4 g/t Au for approximately 139koz** of contained gold²² consisting of the Wattle Dam, Eagles Nest, Larkinville, Hilditch and 5B deposits. The Mandilla PFS did not contemplate any contribution of ore from Spargoville but does utilise the Spargoville tenure for locating infrastructure and the associated operational footprint.

AAR also holds other tenement interests at its Carnilya Hill project in the Western Australian Goldfields.
