

## PROGRESS UPDATE ON LADY JULIE GOLD PROJECT

Magnetic Resource NL (**Magnetic** or **the Company**) is pleased to provide this update on activities that are being undertaken to advance its 100% owned Lady Julie Gold Project (**LJGP** or the **Project**), situated in the Eastern Goldfields of Western Australia.

### Highlights

- **Updating underground mine design and development schedule to incorporate additional Resources<sup>1</sup> associated with high-grade core 3, reduce pre-production CAPEX and improve mined ore recovery.**
- **Engaging with providers of Mining Services to assist with open pit and underground mining considerations.**
- **Detailed engineering work in progress for key infrastructure including tailings storage, water supply and pit dewatering, camps and power supply in progress.**
- **Investigating impacts of ore variability on the process plant performance and opportunity to utilise additional gravity process rather than flotation to improve gold recovery.**
- **The Company is also actively responding to requests from the Department of Mines Petroleum and Exploration (DMPE) for information (RFIs) associated with our Mining Proposal (submitted November 2024) since the granting of Mining Leases in July 2025<sup>2</sup> and September 2025<sup>3</sup>.**

### Magnetic's Managing Director, George Sakalidis, commented:

*The Feasibility Study on Magnetic's Lady Julie Gold Project has already demonstrated it is one of the highest margin undeveloped gold projects in Australia<sup>4</sup>.*

*We are using this time to optimise the project via a number of works streams aimed at reducing execution risk and improving operational certainty for the project. This work remains in progress and while results are encouraging it is yet to be completed. We look forward to providing an update on the final outcomes of this work early 2026.*

*Magnetic is continuing discussions with numerous financiers looking at providing financing for the very promising Lady Julie Gold Project. Concurrently, interested mining companies are completing due diligence studies."*
