

22 DECEMBER 2025

## Gold and Antimony Drilling Program Update

### HIGHLIGHTS

- Drilling at the Company's flagship gold and antimony project reached a significant milestone
- High-grade Vail Road Gold Deposit drilling completed
- Samples from target zone intercepts have been sent for assay, with results expected in January
- Antimony drilling at Bond Road to commence in January

Albright Metals Limited ("Albright Metals" or "the Company") has successfully completed an infill and extensional drilling program at its Vail Road High-Grade Gold Deposit. Approximately 1020 metres of oriented HQ diamond drilling has been completed over 15 drill holes, with target zones intercepted where expected. Samples from target zones have been sent to a laboratory for assay, with results expected to be received progressively during January.

The rig will be moved to the Bond Road Antimony Prospect next, to conduct an initial exploration drilling program targeting antimony in an area of strong soil anomalism and where high-grade stibnite boulders have been found at surface.<sup>1</sup> Drill site preparation and access clearing has been completed, with exploration drilling planned to commence in early January. The exploration program will target high-grade antimony veins within interpreted fault structures, with up to 1,200m of diamond core drilling planned.

Assay results from both programs will be reported to the market as they are received.

CEO, Greg Hill comments, "*We are very pleased with the quality of drill core recovered from what has been a successful campaign at the Vail Road Gold Deposit. We eagerly await the sample assay results and look forward to commencing the next phase at Bond Road Antimony Prospect.*"

The Golden Pike Gold and Antimony Project in New Brunswick, Canada is highly prospective for high-grade gold, silver and antimony at multiple locations on the property. The Company's current focus is on progressing the Vail Road Gold Deposit, which has a NI 43-101 Foreign Resource Estimate,<sup>2</sup> towards development. Drill results and data acquired from infill and extensional drilling will be utilised to upgrade the foreign resource estimate to a JORC compliant mineral resource estimate.

In parallel with development work for the Vail Road High-Grade Gold Deposit, multiple targets for gold and antimony mineralisation across the northern half of the Mineral Claim are being evaluated and prioritised for follow up exploration.

## ABOUT ALBRIGHT METALS

Albright Metals' current projects are located in Canada and Western Australia, both Tier One mining and exploration jurisdictions.

Albright Metals has executed an agreement with Globex Mining Enterprises Inc. (GMX-TSX, GLBXF-OTCQX, G1MN-FSE) to acquire the Golden Pike Gold and Antimony Project in New Brunswick, Canada.<sup>3</sup> The project covers approximately 3,292ha of contiguous mining claims which includes the Vail Road high-grade gold deposit classified under NI 43-101,<sup>4</sup> and the exploration-stage Bond Road antimony prospect. The Golden Pike Project is in an area that is close to road, rail, port and grid power infrastructure. Southern New Brunswick is on the Canadian east coast, adjacent to Maine, USA. It enjoys a mild maritime climate, allowing year round exploration activities. The province has a mature mining services industry and has historically produced antimony and gold from multiple mines.

The Company's Bryah Basin licences cover 1,048km<sup>2</sup> and hold potential for copper and gold. Albright Metals also has a substantial \$7M manganese joint venture on the licences with ASX listed OM Holdings Limited (ASX: OMH), with OMH having already spent over \$4.5 million to earn-in to the Manganese Rights of the project.

Albright Metals holds a suite of mineral rights, including copper, nickel and gold, over the Gabanintha project, near Meekatharra,<sup>5</sup> which has a JORC 2012 Mineral Resource for Cu, Ni, Co and additional structural gold potential.

Albright Metals was formerly known as Bryah Resources, trading under the ASX code BYH.

## EXPLORATION RESULTS

Where the Company refers to Exploration Results in this announcement (referencing previous releases made to the ASX), the Company is not aware of any new information or data that materially affects the information included in the relevant market announcements.

## FORWARD LOOKING STATEMENTS

This announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Readers should not place undue reliance on forward looking information. The Company does not undertake any obligation to release publicly any revisions to any "forward looking statement" to reflect events or circumstances after the date of this report, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.
